

# Blocks Floor Display

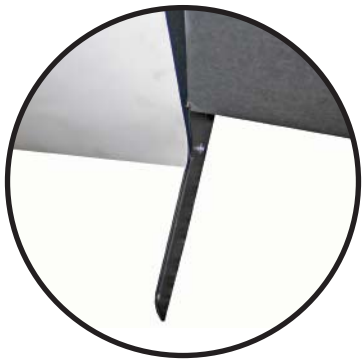

## Step 1

Fold one of the blocks open. Then fold one of the top flaps inward. With the first flap still folded inward, fold the other flap in onto the first flap so that they lock together as shown. Repeat for bottoms.

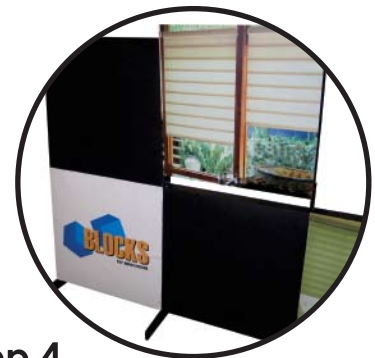

## Step 2

Starting at the bottom left corner of the first block, add a foot as shown. Then add another foot to the bottom right corner of the same block.

## Step 3

Slide the next block over the foot from the bottom right corner of the first block as shown. Repeat Step 3 and 4 until you get to the last block on the bottom layer. On the last block, add a foot to the bottom right corner as you did to the bottom left corner of the first block. (See Step 2)

## Step 4

To stack blocks vertically use a connector in the same manner as you did the feet. Then slide the blocks onto the connectors of the blocks below. Repeat for each row of blocks.
